

This fast-acting, odorless liquid drain and sewer opener is convenient to handle and ready to use. It opens drains and sewers by dissolving and liquifying fats and oils, lint, hair, paper, food and other organic matter. Because it is heavier than water, it sinks below the water level to the point of obstruction and immediately starts to penetrate and dissolve the blockage.

DIRECTIONS

For Sewer Mains: Pour 2 to 4 gallons into manhole or drain upstream and as close to the obstruction as possible. For best results, use regularly to keep sewer main open and free flowing.

For Laterals: Pour one gallon into drain upstream and as close to the obstruction as possible.

For Drains: Pour 1/2 to 1 quart slowly into the drain. Allow to work for 30 minutes. For difficult obstructions, a second treatment using the recommended quantities may be necessary. Where there is a history of sewers, laterals and drains becoming obstructed, the regular use of this product at weekly intervals (or more often if required) will keep the line open and free flowing.
