

LEMON SEWER SWEETENER

CONTAINS NO HARMFUL SOLVENTS
WILL NOT DISRUPT BACTERIAL ACTION

FORMULATED TO CONTROL OBNOXIOUS ODORS
IN SEWAGE PLANTS, LAGOONS, MAINS & LATERALS
ALSO GARBAGE CONTAINERS, HAULERS & DUMPS

CAUTION

May irritate eyes. See side panel for additional
precautionary statements and first aid instructions.

KEEP OUT OF REACH OF CHILDREN

Sold By:

Use a fresh approach to the difficult problem of controlling offensive odors in sewage plants, lagoons, aerators, sewer mains and laterals and for garbage containers and dumps. It effectively neutralizes odors without harming bacterial action in digesters, lagoons, filters, septic tanks or drain fields.

DIRECTIONS:

To control odors in aerators, lagoons, open digesters and filter beds, inject undiluted into the line leading to the source of odor. The amount required will vary with the temperature, air movement and intensity of odor to be removed.

Also spray or mist undiluted over the source of odors, allowing air motion to carry it over the area.

To control odors in sewer mains and laterals, pour spray or drip undiluted into the lines. Also spray thoroughly manholes and drains.

For garbage containers, trucks and dumps, spray liberally over the source of the odor.

CAUTION

In case of contact with eyes, flush with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical attention.
